

CHART PROJECTORS

Everlight
Chart Projector

Standard
Chart Projector

Your choice of halogen or standard incandescent illumination.

EverLight Chart Projector features long-life halogen bulb for up to 2,000 hours of service between bulb changes.

Standard Chart Projector employs incandescent illumination with thermistor for extended bulb life.

Variable focus objective.

Choice of mounting brackets with yoke.

Single slides incorporating letters, illiterate E's and child's figures.

Accepts all standard, popular American slides.

Air-flow design provides for cooler operation, longer bulb life.

Slide operable from either side for selection of test.

Selector slide with duochrome test; full and vertical aperture.

Horizontal line selector for projection of single line.

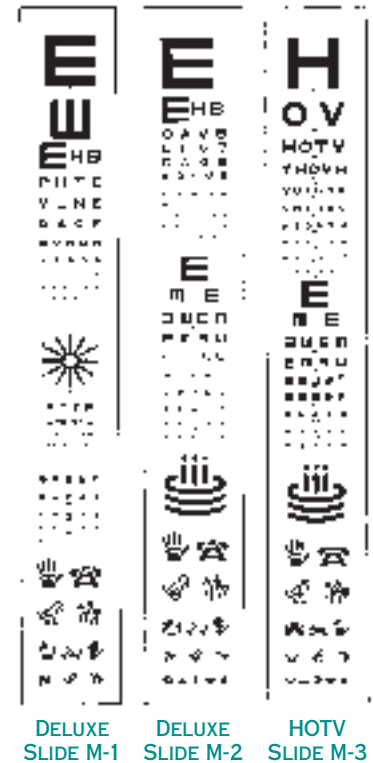

Easy bulb replacement.

Only Marco could offer you a choice of two feature-packed standard projectors ideal for any practice. The **MARCO EVERLIGHT CHART PROJECTOR** uses a halogen bulb for longer life—up to 2,000 hours under typical use. The **MARCO CP-1 CHART PROJECTOR** offers a lower initial cost with an incandescent illumination system that includes a thermistor for extended bulb life. And both provide exceptionally even illumination over

the entire chart field. The variable focus barrel on both projectors is designed to provide accurate testing of visual acuity at any distance from ten to twenty feet. And both models may be used with either a wall, table, or unit mount. Both instruments will also accept all major slides, including Marco's Adult, Child and HOTV Recognition Slides. No matter which model you choose, you can't go wrong with Marco.
