

# ReMarcoble truths

## EMR Integration with a Single Click.

“The **M3** from Marco provides us with fast and accurate refractive and keratometric measurements, and the high-volume, low pressure air puff doesn't startle patients as old NCT units did. In addition, the M3's tonometry measurements are extremely accurate compared to Goldmann readings on the same patient.

When we decided to adopt EMR in our office it was an all or nothing decision...we are able to upload all the data from the M3 and the rest of our refraction directly into our EMR with a click of a button, where it becomes a permanent part of the exam record. The M3 has made the transition to true paperless an easy one!”

—Michael Chow, OD, MBA • Bellevue, Washington
